

CAITLIN O'GRADY

ogradycaitlin333@gmail.com | 781-715-5715 | [Portfolio](#)

EDUCATION

University of Michigan, Ann Arbor | *M.S. in Big Data Analytics* | **GPA: 3.812**

- Courses focused on data analytics, data science, data visualization, and programming
- Developed skills in data analysis, data mining, statistical modeling, machine learning, predictive analytics, and database management

University of Michigan, Ann Arbor | *B.S. in Biopsychology, Cognition, and Neuroscience* | **GPA: 3.804**

- Courses focused on the biological, cognitive, and psychological processes behind human behavior and experience
- Completed extracurricular coursework in programming, statistics, data analysis, website development, UI/UX, and user-centered design

EXPERIENCE

Kubrick Group | *Data Engineering Consultant* | **January 2026 - Current**

- Completed a Data Engineering for Modern Data Platforms training program in scalable, cloud-native data infrastructure, gaining skills in data architecture, analytics governance, and platform engineering for modern enterprise environments
 - Cloud-native data engineering: secure, scalable ETL pipelines using Databricks, Apache Spark, Delta Lake, and Unity Catalog governance
 - Production Python and software engineering: modular, production-grade Python development
 - Data modeling and architecture: building data structures for analytics and warehousing
 - Analytics, business intelligence, and machine learning
 - Version control and team collaboration

University of Michigan Athletics, Digital Communications Team | *Intern* | **Sept. 2023 - May 2025**

- Collected and analyzed user data across digital platforms to evaluate content performance to identify trends and opportunities. Created reports on user activity to support data-driven decisions on content optimization and strategy

PROJECTS

- [NFL Draft Prediction Model](#) - network analysis and machine learning
- [Mapping Success in Women's Basketball](#) - computer vision and machine learning
- [Football Player Similarity and Performance Prediction](#) - data mining and predictive analytics

Further information on these and other projects and the corresponding code can be [found in my portfolio](#)
